
H1: p95 Peak Upward Deviation, Light Turbulence. Note. Column: corridor p95 of each arm's per-leg peak height above the boom-tip, truth channel. Black whiskers: each column's CI. Lower means increased height margin for vertical deconfliction. Dark columns: Includes the 0.25 m PTA vertical offset (S1O, A2O, PIDO). Light columns: No PTA (S1, A2, PID). n = legs that entered the corridor. Dotted orange line: 2.00 m H1 vertical deconfliction bar. Solid red line: 3.42 m DHC-2 airframe-contact plane. Shaded orange band: the 1.42 m built-in altitude-guard reaction margin.
